INFO: Chief, III Division; Chief, WOIORR		ONLY QUALIFIED PERSON CAN JUDGE INDEXING
FROM: Chief of Station, Mexico City		APPROVAL:
SUBJECT: AQUATIC RESEARCH REFACTORY Construction of Telescope-Lenses		
ACTION REQUIRED - APPROVED		
<p>Reference: MEXICO CITY 18654</p> <p>1. Two of the Station photographic operations, REFACTORY and REAPROX, have been using the Leica and 100 Bauscope and Leica camera combination for approximately twelve years. These two operations provide valuable photographic coverage of two important targets and new equipment is required to improve the photographic quality and increase the capability for longer coverage during the day when light conditions are poor.</p> <p>2. The Bauscope in the REAPROX-1 GP has a 15X eyepiece and is located in a very small room. A full length tube telescope lens of 1000 mm will not fit into the space without taking out a concrete wall partition. Therefore a compact catadioptric lens is required for the project.</p> <p>3. The Bauscope in the REFACTORY-2 GP should also be replaced by the same type of lens system mentioned in paragraph 2. The Bauscope now in use is operated from the top of a table where REFACTORY-2 must also stand to take pictures over a high wall in the foreground. The system must be removed from the table when not in use and stored in a locked foot locker. For these reasons the lens and camera should be light and compact to facilitate their use and storage.</p> <p>4. As can be seen from paragraphs two and three a light weight compact lens system is desired for both projects and the Station</p> <p style="text-align: right;">-continued</p>

is anxious to replace the old units. The operators are starting to climb the walls after three or four years of peering through the telescope. A verbal request had been presented to the laboratory in the 1000 m catadioptric optical systems with constant focal length lenses. Please advise when these units can be obtained and the costing procedure. SSMANARA has started the action on at least one of these systems through SERVICE.

DISPATCH

Audit Report

20740-3100767

November, 1963, and we recommended that the matter be brought to the attention of the appropriate authorities. The current audit disclosed that little or no action has been taken on this matter.

Recommendation: We recommend that the Station determine whether FRBAPANE owes WAFIRM for 1963 taxes, compute profits, and notify FRBAPANE of the results of the investigation.

Warehouse Rent in Excess of Lease Not Adequately Documented

The most recent lease for the LIONION warehouse (MEXI-62) was dated in 1962 and provides for monthly rental payments of \$1,000. Since then, the rental payments have been increased to \$1,250 per month, but the lease has not been changed because, in accordance with local custom, the landlord is reluctant to enter into a new lease due to the costs involved and the income tax implications.

Recommendation: We recommend that a memorandum for the record showing the revised rent be prepared and approved by the Chief of Station or other designated Station official.

Revision of Education Allowance Requires Adjustment of Amounts Paid

Education allowances for Mexico City were revised for some grades during the current fiscal year; however, the Station did not retroactively adjust the allowances already paid, as required by section 57c of the administrative regulations.

Recommendation: We recommend that education allowances paid for the current school year be recomputed and adjusted to the revised allowances.

Proceeds of Property Sale Not Recorded in Finance Records

In our review of property transactions, we noted two instances (Vouchers 100 and 101) where responsibility was dropped because, according to the property owners, the proceeds

AQUATIC/LIONION
Technical Information

Reference: HMMA 31767 dated 11 April 1967

1. LIONION 1 photographic results continue to be satisfactory for all concerned. It is therefore advisable that no changes in procedure be made at this time.

2. It is apparent that LIONION 1 relayed the incorrect developing formula for the pulse camera film. Perhaps this error is due to his inactivity in processing such film for over a year. Since the conception of this operation all pulse camera film has been developed in Microdol X. On the other hand, Tri X film used in the LIONION 2 operation (Pentax camera and Balascope) has traditionally been developed in Acufine.

3. All pulse camera film is processed at Headquarters by an automatic Huston system. Time and temperature information which the lab uses would be of little value to your development procedure. The results of your recent test indicate that it should be satisfactory for an occasional check on the equipment.

4. The difference between Plus X Negative and Plus X Pan film is worth only one half "f" stop, which should cause no problem if you decide to use the latter.

FROM	Chief of Station, Mexico City		MICROFILM
SUBJECT AQUATIC/PBRUMEN/LIONION -- Transmittal of 35mm Pulse Camera			
ACTION REQUIRED - REFERENCES Reference: MEXI-3960 1. The attachment contains the defective 35mm Pulse Camera previously reported in referenced cable. Very little additional information can be supplied, concerning this mechanical failure, other than that reported in the reference. This particular camera was installed on 16 June 1965 and operated normally from that date until the afternoon of 28 June, at which time it began to continually blow fuses. Hugh T. FRANCOTTE entered the LIONION photographic basehouse that night, and when it was found that the problem could not be corrected on the scene, the camera was removed and taken to MKCHARITY for further troubleshooting. It was finally discovered that the shutter motor was malfunctioning and partially burned-out. Joseph M. RESCIGNO stated that since there was a definite "short" in the motor, this would cause the camera fuses to constantly blow. 2. Also included in the attachment are two (2), one hundred foot capacity, film magazines. Both of these magazines are faulty, causing the film to jam. They were both in use with the previous Pulse Camera which became inoperative during late May and was forwarded to KURIOT Headquarters for repair. FRANCOTTE had two (2) new magazines in stock, and they were issued to LIONION/1 for use with the camera presently being returned for repair or replacement. <p style="text-align: center;">Willard C. (B) DIR 06231, 1 May 1965

2P

1. Attached (USC) are the expired genuine PBRUMEN passports of LIONION-1 and LIONION-2 together with two photographs and five signature specimens of each agent.

2. It is requested that new PBRUMEN passports be prepared by KURIOT and pouched to the Station as soon as possible.

3. The assumption of reference B that passports obtained at the PBRUMEN Embassy in Mexico City are actually issued in the PBRUMEN Capitol City is correct.

4. The old passports should be returned to the Station as the Mexican immigration visas appearing of pages 11 and 19 of the LIONION-1 and LIONION-2 passports, respectively, must be in the possession of the Subjects until they are granted their final immigration documents.

1. PBRUMEN ORDINARY PASSPORTS FOR LIONIONS 1 AND 2 HAVE EXPIRED. SUBJS CANNOT TRAVEL FROM MEXI BECAUSE MEXI GOVERNMENT WILL NOT ISSUE REENTRY PERMIT IN EXPIRED PASSPORT, PBPRIME GOVT WILL NOT ISSUE VISA IN ABSENCE MEXI REENTRY PERMIT. MEXI GOVT STANDS PAT EXPLAINING, RIGHTLY, THAT PBRUMEN EMB WILL ISSUE NEW PASSPORT TO ANY PBRUMEN CITIZEN REGARDLESS OF POLITICAL LEARNINGS HENCE LIONIONS MUST GET NEW PASSPORTS.
2. FOR REASONS OPERATIONAL SECURITY LIONIONS CANNOT VISIT EMB FOR NEW PASSPORTS SINCE THEY KNOWN BY SIGHT TO EMB PERSONNEL AS MEXICAN NEIGHBORS. THIS SITUATION RESULTED IN COMPLICATED AND EXPENSIVE CXO ESCORTED "BLACK" BORDER CROSSINGS BY LIONIONS LAST YEAR WHEN THEY VISITED RELATIVES IN PBPRIME.
3. CAN HQS OR JMWAVE ISSUE NEW PBRUMEN PASSPORTS FOR BOTH AGENTS? PLS CABLE PROCEEDURE. MEXI PREPARED POUCH OLD PASSPORTS AND SPARE PHOTOS. LIONIONS WISH TRAVEL SOON.
4. FYI JMWAVE: LICRAFT-1 RECENTLY PURCHASED TWO EXCELLENT NEW PBRUMEN PASSPORTS IN JMWAVE AREA FOR HIS SONS, AT COST 75 DOLLARS

SUBJECT

AQUATIC/Operational -- Availability of the Nikon Television System

MICROFILM

ACTION REQUIRED - REFERENCES

1. At the time of Hugh T. FRANCOFFE's departure from Headquarters, KURIOT had recently begun an extensive evaluation of the Nikon closed circuit television system. If this particular system is now considered "operational", FRANCOFFE wishes to be so advised, as there may be a possible application for it in support of an operation at the Mexico City Station. Lawrence F. BARKER was recently briefed by FRANCOFFE on the Nikon system, and is now interested in obtaining additional facts concerning it. BARKER, who is responsible for the LIONION Project, foresees a possibility for its use in the LIONION photographic basehouse.

2. It was thought that perhaps the system could be further "operationally tested" at this basehouse, and at the same time, the Station could examine the possibility of a permanent installation. Presently, LIONION/1 is utilizing a Balscope and Pentax camera for obtaining photographic coverage of the entrance to the PBRUMEN Embassy. Provided the television camera could be equipped with a telephoto lens of about the same focal length as the combination of the Balscope and 20X eyepiece, this system might be a suitable substitute for the equipment now in service.

3. It is requested that the Mexico City Station be advised if the Nikon television system is available, and Headquarters thoughts concerning the testing of it at the LIONION basehouse.
